Get SAFE

Support After Financial Exploitation

Considering a High Court's recent warning on the misuse of AI in legal proceedings, we want to make our position clear:

At Get SAFE, we never use AI to generate legal citations or advice.

Our tools are designed to support victims of financial crime by helping them organise evidence, understand rights, and communicate clearly—not to provide legal representation.

We strictly avoid fabrications, and all users are encouraged to verify facts through trusted legal sources or seek regulated legal advice where necessary.

AI can be a powerful force for good—but only when used transparently, ethically, and with human judgment. That's the standard we uphold.

Get SAFE

Support After Financial Exploitation

When the system fails, the people rise.

- Tens of thousands affected by financial exploitation.
- Tens of billions lost with little redress.
- Many are left without legal support or representation.

Get SAFE
Support After Financial Exploitation

AI as a force multiplier:

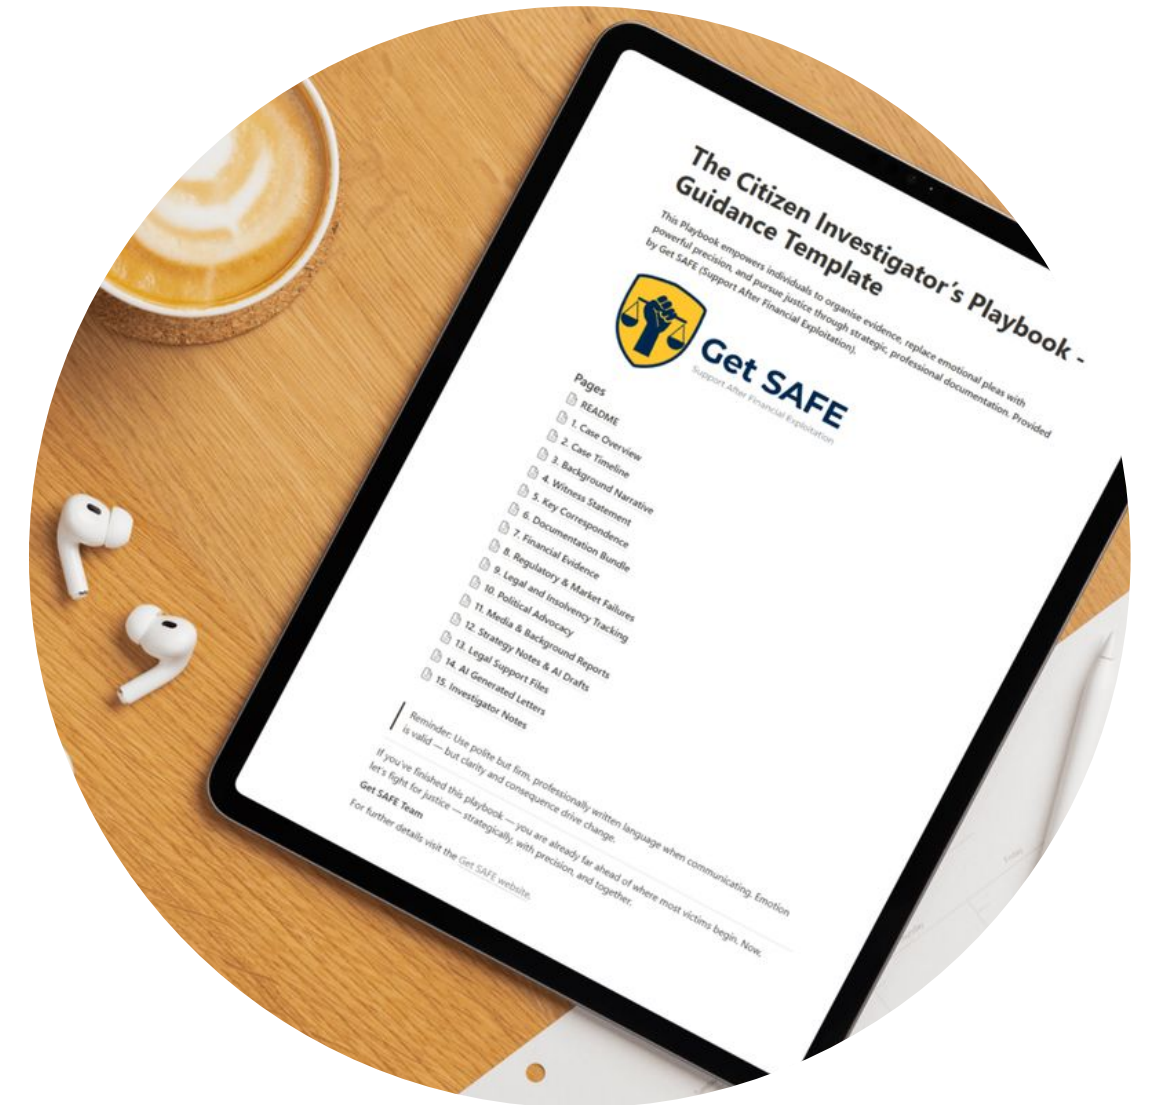

- Sorts complex evidence (emails, PDFs, transcripts)
- Detects deception and inconsistency
- Drafts persuasive redress submissions
- Offers trauma-informed support workflows

Get SAFE
Support After Financial Exploitation

Built in Notion + AI

- Evidence vaults
- Deception detection
- Redress templates
- Role guidance & collaboration

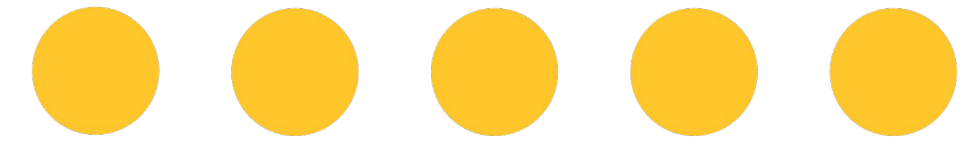

Get SAFE
Support After Financial Exploitation

Human + Machine = Justice

- AI amplifies empathy, it doesn't replace it
- Peer mentors + tech = transformation
- Truth finds voice through design

Get SAFE
Support After Financial Exploitation

Use AI to guide, not decide.

- No legal advice or representation
- Privacy-first design
- Trauma-informed outputs
- Transparent, non-commercial use

Get SAFE

Support After Financial Exploitation

Justice won't trickle down. We must build it from the ground up.

- Support open-source AI tools for justice
- Join cross-sector collaborations
- Support victim-led tech initiatives
